Senior Team Lead, Software

:

Professional Work Experience

Associate Member of JCP (Java Community Process) Community

Ø

Extensive experience working on a cloud-based infrastructure and tools.

Ø

Ability to deliver successfully under highly pressurized situations.

Ø

Experience using project management tools like Rally, Confluence, slack and Jira.

Ø

and Root cause analysis.

Involved in diverse roles and responsibilities varying from Requirements gathering, Design, coding, testing

Ø

estimates and status reporting and onsite and offshore development.

Expertise i

n D

Ø

Proficient in using RDBMS concepts with Oracle and MySQL.

Ø

Experience in client-side Technologies such as HTML5, DHTML, CSS, JavaScript and J-Query, Angular JS

Ø

Worked on Event Based Architecture, Message Queues and Enterprise Integration Patterns.

Ø

Experience in working with Spring MVC, Design Patterns, ORM Frameworks like Hibernate, MY-BATIS.

Ø

and IntelliJ.

Experience in working with IDEs like Eclipse, Rational Application Developer (RAD), J-Developer, NetBeans

Ø

Have commanding experience in handling batch jobs. Which feeds data to different API's and applications.

Ø

J-Boss, WebSphere Application Server 7.0/8.0, WebLogic Apache Tomcat 7.0/6.0

Expert skills in designing and implementing web server solutions and deploying java application servers like

Ø

and Testing of Object-Oriented applications and web-based Enterprise Applications.

Strong experience in Software Development Methodology such as SDLC, Analysis, Design, Implementation

Ø

Scrum, Waterfall model and TDD (Test Driven Development), Scaled Agile (SAFe) process.

life cycle, optimized and implemented core functionality of agile tactics such as XP (extreme programming),

Expertise in Agile Methodology, worked and developed applications under the Agile Software Development

Ø

Directly managing a team of 10 engineers onshore and an offshore engineering team in India.

Ø

success.

triaging team

help the

and Rocs to pull the exact root cause for the failures to

Splunk

Querying data log tools like

Ø

to execute the test cases on daily basis and reports were sent in email

Jenkin jobs

Creating

Ø

and pipeline for client.

devops platform

Implementing the

Ø

standard

by maintaining Capgemini quality

Technical reviews, design review, code quality

Supporting

Ø

Triaging application defects when impacted the test case execution or delivery

Ø

standards

and doing review fixes to maintain the coding

Stash, Bitbucket, performing peer reviews

Using

Ø

Following coding standards aligned with Sonar Lint and SonarQube

Ø

Developing step definitions from Gherkin feature files

Ø

Cucumber, Gherkin, SonarQube

TestNG, BDD framework using

Developing automation scripts in Selenium WebDriver with Java under

Ø

Coordinate with offshore teams

Ø

and frontend development

JavaScript, Struts, AJAX, J-Query for MVC
