GHULAM SEDDIQ SORUSH

Email: gs.sorush@gmail.com Phone: +1 (202) 793-1044
Address: Carmichael, California

Professional Summary:

- **Over 10+ years of extensive experience as a Full Stack Software Developer.**
- Solid experience in developing **enterprise level application** with the latest technologies and modern methodologies and architectures.
- Extensive experience in programming languages like **Java, SQL, Node JS, JavaScript, HTML5, CSS3**.
- Experience in all phases of **SDLC** like **Requirement Analysis**, **Implementation** and **Maintenance**, and extensive experience with **Agile** and **SCRUM** and Test-Driven Development (**TDD**).
- Proficient in developing Single Page Applications (**SPA**) and well experienced in **Vue**, **React**, and **Angular**. Proficient in CSS Frameworks like Tailwind, Bootstrap, Vuetify, etc.
- Proficient in **Unit testing** experienced in **Jest**, **Vitest**, **Jasmine**, test runners.
- Knowledgeable with **CI/CD** initiatives using tools such as Jenkins.
- Expertise in **RESTful**, **SOAP** and **GraphQL** web services to integrate between Application to Application.
- Knowledge of utilizing cloud technologies including Amazon Web Services (**AWS**), Microsoft **Azure** and Google Cloud Platform (**GCP**).
- Proficient in **MySQL**, **MS SQL Server**, **PostgreSQL**, **MongoDB**, **Redis**, **Oracle**, and Services like **FireStore**.
- Experienced in **Apache Kafka**, **ActiveMQ**, and **Rabbit MQ**.
- **Mobile app development** in Java, Flutter, React Native, etc.
- Well experienced using different **OSs** and having good knowledge **Computer Networking**.
- **Working experience with C, C++, Rust, Go, Python, and Kotlin**

Education:

PUNE UNIVERSITY

Bachelor of Technology (Electronics Engineering)
Pune University, Pune 411007, Maharashtra, India. Rank# **First Class**

Work Experience:

Williams-Sonoma | San Francisco Bay Area, CA
Team Lead UI (October 2021 - Present)

- Migrating Williams-Sonoma E-Commerce platform from and an old MVC platform to a Micro Frontend Architecture.
- Assisting with the product improvement in adopting new technologies for the legacy systems
- Resolving e-Commerce platform RM and PM bugs and issues
- Help build out standards and processes to ensure high quality work of all developers
- Work with Project Managers and/or the Technical Lead to manage time estimates and completion accuracy of assigned project tasks
- Review designs and approaches for best practices in UX

Tech Used: Java, Spring Framework, SQL, Node JS, Express, HTML, CSS, JavaScript, Lit-element, Vue, Git, SVN, Jira

MDout, Inc. | San Francisco Bay Area, CA (Remote)
Lead Developer (November 2020 – October 2021)

- Lead a group of Frontend Developers in the development of a SaaS based Optometry EHR system targeted for USA based Optometry clinics
- Assisted with the product architecture and collaborated with backend engineers on system design
- Help mentor and guide other Frontend Developers overseas and in US on best practices individually and in group course setting
- Help build out standards and processes to ensure high quality work of all developers

- Work with Project Managers and/or the Technical Lead to manage time estimates and completion accuracy of assigned project tasks
- Assisted and trained other developers in technologies such as Node, Angular, etc.
- Developed Frontend application in Angular, with an integrated chat bot with BotKit JS.

Tech Used: Node JS, Express, MongoDB, React, Angular, BotKit, Git, Adobe XD

International Organization for Migration (IOM)

Senior Frontend Developer (Jul 15, 2020- March 30, 2021)

- Work with other Frontend Developers building out strong code and sites
- Help mentor and guide other Frontend Developers in best practices
- Help build out standards and processes to ensure high quality work of all developers
- Work with Project Managers and/or the Technical Lead to manage time estimates and completion accuracy of assigned project tasks
- Review designs and approaches for best practices in UX
- Built Frontend Applications using Vue JS
- Create compelling solutions and functionality that inspire users and meet business goals
- Stay current on developing technologies and properly utilize them in your work

Tech Used: Java, Spring, Node JS, Vue JS, Apache Kafka, C#, .NET, HTML, CSS, JavaScript, Git, Adobe XD

United Nations Development Program (UNDP)

National Consultant - Application Developer, Design and Development of Mobile Applications) (Nov-Dec 31, 2019)

- Design, Develop and Test Mobile applications under UNDP-LoGo project for Deputy Ministry of Municipalities (DMM-IDLG)
- Using Clean Architecture and Test-Driven Development, Designed Good Citizen Mobile Application
- Designed, Developed Urban Kids, first Mobile Game Application for Kids in Afghanistan to be familiarized with Urban Society
- Using Kotlin, and Swift to develop for both Android and iOS platforms
- Designed and Developed Admin Dashboard Using Google Firebase and VueJS for Good Citizen Mobile Application
- Both applications (Good Citizen, Urban Kids) are uploaded on Google PlayStore

Tech Used: Vue, Flutter, Firebase, Parse Server, Git, Adobe XD, Jira

International Organization for Migration (IOM)

Senior Database Administrator (Dec 12, 2018- July 30, 2019)

- Involved in design and development of various software systems for different projects
- Setting the technology trends and standards building upon the future
- Clean Architecture, fast-paced, agile environment in ASP.NET Core
- Using React JS, Vue JS to develop Frontend for applications
- Design and development of mobile applications for projects
- Implementation of Data Modal, Block Chain and Offline-first

Tech Used: Java, Kotlin, C#, HTML, CSS, JavaScript, Vue, Quasar Framework, .NET, MS SQL Server, Adobe XD, Flutter, Dart, GIT

Ministry of Communications and Information Technologies

Software Engineer (Oct,2016- Dec 20, 2018 1 years 3 months)

- Design, develop and deploy software solutions for the government entities by studying needs; conferring with users; studying systems flow, data usage and work processes; investigating problem areas; following the software development lifecycle.
- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development and proposed solutions.
- Integrate software components into a fully functional software system.
- Document and demonstrate solutions by developing documentations, flow charts, layouts, diagrams, charts, code comments and clear code.
- Develop software verification plans and quality assurance procedures.

- Develop and direct software system testing and validation procedures programming and documentation.
- Supervise and cooperate software developers' team.
- Determine system standard performance.

Tech Used: C#, ASP.NET, SQL, SQL Server, HTML, CSS, JavaScript, REST, jQuery

SPEENSOFT

Software Engineer (Aug-2016-Oct 2017, 1 year, 2 months)

- Design, develop and implement web applications, web sites, and mobile applications.
- Support and develop software developers by providing advice coaching and educational opportunities.
- Provide information by collecting analyzing and summarizing development and service issues.
- Head of Mobile Application Development section.
- Update own job knowledge by studying state-of-the-art development tools programming techniques and computing equipment; participating in educational opportunities; reading professional publications; maintaining personal networks; participating in professional organizations.
- Prepare and install solutions by determining and designing system specifications, standards, and programming.
- Develop software solutions by studying information needs; conferring with users; studying systems flow, data usage, and work processes; investigating problem areas; following the software development lifecycle.
- Recommend improvements to existing software programs as necessary

Tech Used: Java, Angular, Vue, Laravel, React, React Native, FuseTools, NativeScript, Google Firebase.

UnionSys Technologies, Pune India 411001

Oracle Database Administrator – Part time (Jan-June 2016, 6 Months)

- Installation and configuration of new Oracle, SQL Server, MYSQL etc. databases
- Create backup and recovery plans and procedures based on industry best practices
- Monitoring databases for performance issues
- Troubleshooting in case of any problem
- Data extraction, transformation, and loading

Imagination Technologies India Pvt. Ltd.

Intern Engineer (June-July 2015, 2 Months)

- Imagination Technologies is a British semiconductor firm with a strong focus on GPU and embedded systems
- Optimized various modules of video codecs (MPEG-2, HEVC) in MSA (MIPS SIMD architecture)
- Created test frameworks to compare codec source code and MSA code
- Experienced working on Very Large-Scale Integrated Circuits (VLSI) projects

Herat Elite Group

Software Developer (Jan-2010 Aug-2012, 2 years 8 moths)

- Analyze user needs to determine technical requirements.
- Using Java, and Java Swing library to develop Desktop applications.
- Using HTML, CSS, JavaScript to develop web applications.
- Create web models or prototypes that include physical, interface, logical or data models
- Using SQL, and MySQL to develop databases that supported desktop and web applications
- Design, build, or maintain web sites, using authoring or scripting languages.

Hijrat Welfare Organization (HWO) and NSDP

Information Technology Technician (Jan-Dec 2009, 1 years)

- Planning, designing, developing and reporting of dynamic knowledge and training content range of IT services
- Delivering effective instructor-led training
- Assist in the design and development of learning programs using multiple modalities
- Consult with subject matter experts to develop impactful training and documentation content related to new and enhanced IT services

Achievements

- Team member of new Afghanistan Passport System development project (documents available on demand)
- Designed, developed, and implement Afghanistan Online Passport System (documents available on

demand) link www.passport.moi.gov.af
- Team member for developing GRP (Government Resource Planning) Software
- Team member for developing National Human Resource Management Information System (HRMIS) at IARCSC.
- Designed, developed, tested, and implemented ZootZoot
    Mobile application. (
    [https://play.google.com/store/apps/details?id=com.zootzoot&hl=en)](https://play.google.com/store/apps/details?id=com.zootzoot&hl=en)
- Designed, developed, and deployed a fully dynamic website with CMS for AAIDO. (https://aaido.af).
- Design, develop, and implement NAPCO ERP, an enterprise software for stock
    management. (https://napco.sulayman.com.au)
- Member of IEEE (Institute of Electrical and Electronics Engineering)
- Internship at Imagination Technologies
- Special Scholarship to India
- Designed, developed and maintain more than 10 web applications, websites and content management
    system (CMS)
- Designed and developed Hospital Management System
- Designed and Developed Frontend and Backend solutions for government entities and other organizations
- Updated with latest programming technologies
- Supervising development team
- Worked at Imaginations Technologies a leading international technology firm.
- Awarded as the best Software & Database Developer at SPEENSOFT
- Team member for developing new Afghanistan Finance Management System
