Software Engineer
Sazgar Engineering Works [30/06/2021 – 10/11/2022]

DMS (Dealer Management System)
DMS is a Windows-based application. After-sales DMS service is any support provided to a customer after the product has been purchased. The use of after-sales DMS support as a business strategy typically leads to higher customer satisfaction, brand loyalty, and even word-of-mouth marketing. After-sales service includes warranty, service, training, or repair for a product.

Tools: C#, Asp.Net, SQL Server, JavaScript

MES (Manufacturing Execution Systems)
Manufacturing Execution Systems (MES) are software solutions that ensure quality and efficiency are built into the manufacturing process and are proactively and systematically enforced. Manufacturing Execution Systems connect multiple plants, sites, and vendors' live production information, and integrate easily with equipment, controllers, and enterprise business applications. The result is complete visibility, control, and manufacturing optimization of production and processes across the enterprise.

Tools: MES ERP

ONLINE SOCIETY MANAGEMENT SYSTEM
Housing Society Office Management System (HSOM). The Housing Society Management has automated functionality for calculating monthly maintenance bills and member can view their bill status on their account. The system provides a unique interface for every user to interact with the system. The system accepts queries from users evaluates the need of the query and fires it over the database and results are displayed to the user.

There is a member who will transfer the society's plot from person to person, he would have access to payment status and can make changes in transfer details but can't edit or make modifications in payment status.
